Pirate Escape Game - Version 3 - Bug Fixes New Features and Other Changes

Bug Fixes/Revisions:

- On each difficulty, the cannon always starts off at the same rotation degree. So in Hard for example, the first 5 cannonballs always go in the exact same direction each round. Can the starting position be randomised so it's different? For all difficulties. Otherwise each round will always be the same.
- There is a 2-3 second delay before the pirate music starts in the actual game. Can you cut this so it gets into the music quicker?
- Can you make picking up downgrade sound louder? It's a lot quieter than picking up powerups sound.

New Features:

- I have had professional graphics and UI designed. I can send you everything. Can you implement it? Main menu screen, Game Level Screen, Death Screen, Info Screen, Level Difficulty Screen, Pirate Ship, Coin etc.
- Add option to mute sound effects and mute music separately. Buttons for these are in the designs I will send you for main menu.
- Can you change the text for picking up the 4 powerups and 4 downgrades? I have included a table below.
- Can you make the new boundary for the cannonballs to bounce off line up with the new game level screen I send? It isn't straight edges.

Other New Changes:

- Can you add a new music track (still Pirate theme) to the Main Menu and the Death screen to more background-like Pirate music and less action? This way it is different to the current track for the gameplay. I like the current gameplay track for actually playing though, this doesn't need to change.
- The cannon speeds up rate of fire quicker in Hard mode than in Easy mode right? Well it still feels like the main difference in difficulty is just because of the initial amount fired. So, on Easy Mode the cannon fires approx. every 5 seconds right? Can we make this 4 seconds for Medium mode and 3 seconds for Hard mode? It can still speed up over time on each mode as well, but I think this will make the different modes make more sense.
- Can you change the Gems to Coins? I will provide the Coin image.
- Change the Gem to a Coin in the 'No Gems' powerup so it matches gameplay.

Powerups	Pickup Text
Make Ship Smaller	Blimey!
2x Score	Booty!
Remove Cannonballs	Parley!
Speed Up Ship	Yo-ho-ho!
Downgrades	Pickup Text
Make Ship Bigger	Landlubber!
Speed Up Cannonballs	Shiver Me Timbers!
Disable Coins	Plundered!
Slow Down Ship	Weigh Anchor!
